DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/03/02 has been entered.

Claims 34-49 are pending. Claims 39-49 are newly added.

Applicant's arguments and amendments have been entered and considered. Any rejections not reiterated below have been withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending

Art Unit: 1631

Application No. 09/776,096 as published in US Patent Application Publication US 20020152035

A1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to methods having the same steps, utilizing the same statistical methods to the same ends. The methods of the instant application: obtain DNA, perform PCR to obtain a signal, analyze the signal using a linear model, and identify an allele, which can then be used to identify an individual. The methods of the '096 application: obtain DNA, perform PCR to obtain a signal, analyze the signal (all in claim 1), wherein the analysis can be a linear model (claim 5) and can be used to identify a person or individual (claims 7, 11). The '096 application also discloses the various limitations of claims 39-49, but does not claim them.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The actual application 09/776,096 is not available to the examiner as of this date. This rejection is based upon the claims as published in the Pre Grant Publication of the Application, published 10/17/2002. If the claims under prosecution now substantially differ from those published, or are not the same claims being examined, Applicant is encouraged to provide arguments and evidence thereof.

Conclusion

The claims are free of the prior art of record.
